- Frontend libraries: TailwindCSS, framer-motion, antd, Redux, RTK Query
- Knowledgeable in WebRTC

## Language

English: Good reading, listening, writing skills

## Hobbies

Meditation, Codeforces, Chess

## Experience

June 2022 - September 2022.

Công ty TNHH NTSOFT, Vĩnh Long

Web Developer Intern

- Throughout my 3-month internship, I was tasked with implementing fundamental CRUD functionality using ASP.NET MVC. In addition, I acquired hands-on experience in utilizing various libraries commonly employed by the company in new projects. Notably, this included working with Tabulator.js for displaying data in a grid format, as well as leveraging Gembox and Spire for more advanced file operations.
- I was also one of the parts of the team responsible for designing UI for the company's new project
- One of my significant contributions to the company involved utilizing my expertise in multithreading and parallel programming in C# in conjunction with Google Tesseract to implement OCR scanning on scanned PDF files, converting them into text

## Personal Project

### Qinqii

Overview: a simple social media website that users can connect to each other

- Github: <https://github.com/shuuxdev/Qinqii>
- Live demo: <https://qinqii.xyz.wf>

### Main features:

- Create, edit, delete, comment on posts
- Create, edit, delete comments
- Users can be able to react and see people who react to posts, comments, messages
- Media viewer for previewing images and videos sent along with posts, comments, messages
- Users can also create stories, knowing who watched their stories
- Notify users when people react, reply to their messages, posts
- Send and accept friend requests, discover people you may know
- User can also update their profile, avatar and background picture
- Chat and make calls to others

### Technologies:

- Frontend: HTML, SCSS, React, TailwindCSS
- Backend: ASP.NET Core, SignalR, Dapper
- SQL: Microsoft SQL Server
